Private Equity allows you to access companies that do not trade on public stock exchanges. Historically, top tier Private Equity funds have been shown to outperform public markets. Along with a potential boost in performance, incorporating Private Equity allows you to diversify into an additional asset class.

The maritime threat to China is a line which must not be crossed. We are entering a new era in the Great Game, where the objective has changed from dominance to containment. Having lost its position of ultimate control in the Eurasian land mass America has selected its partners to retain control over the high seas.

Rebalancing means selling some stocks and buying some bonds, or vice versa, so that most of the time, your portfolio's asset allocation matches your risk tolerance and desired level of …

At the 2011 Asia-Pacific Economic Cooperation Summit held last month in Honolulu, the message President Obama delivered was loud and clear: …
